

Diagnostic view

Over **\$400M** in working capital is trapped in **dead stock**

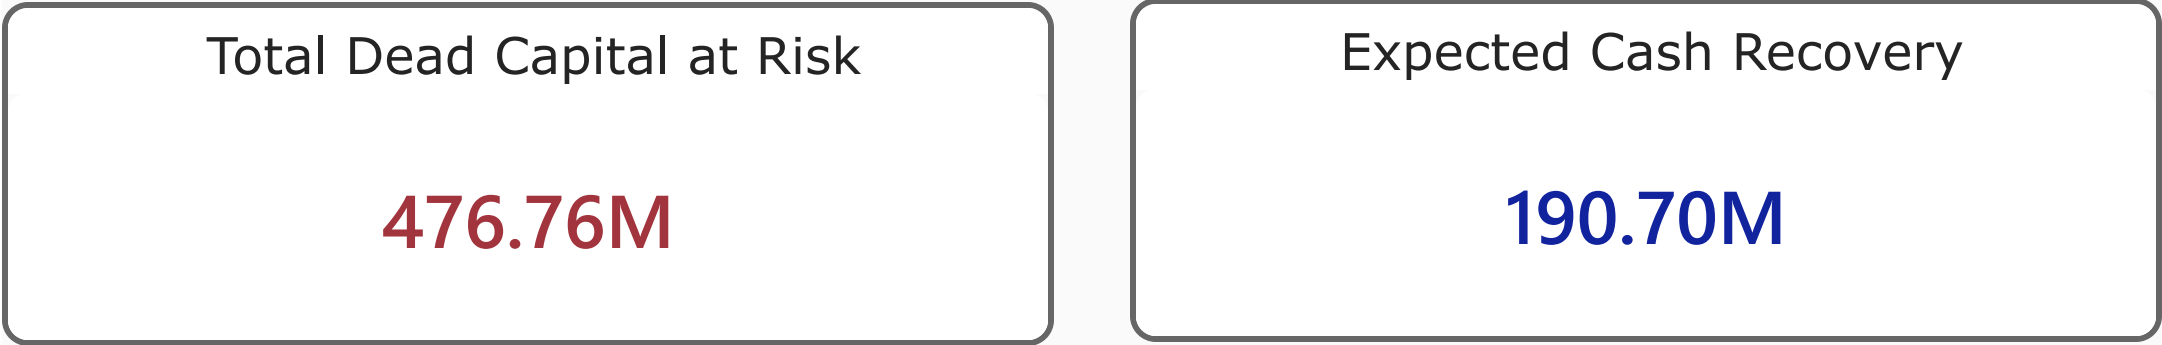

Furniture drives the majority of our supply chain holding costs

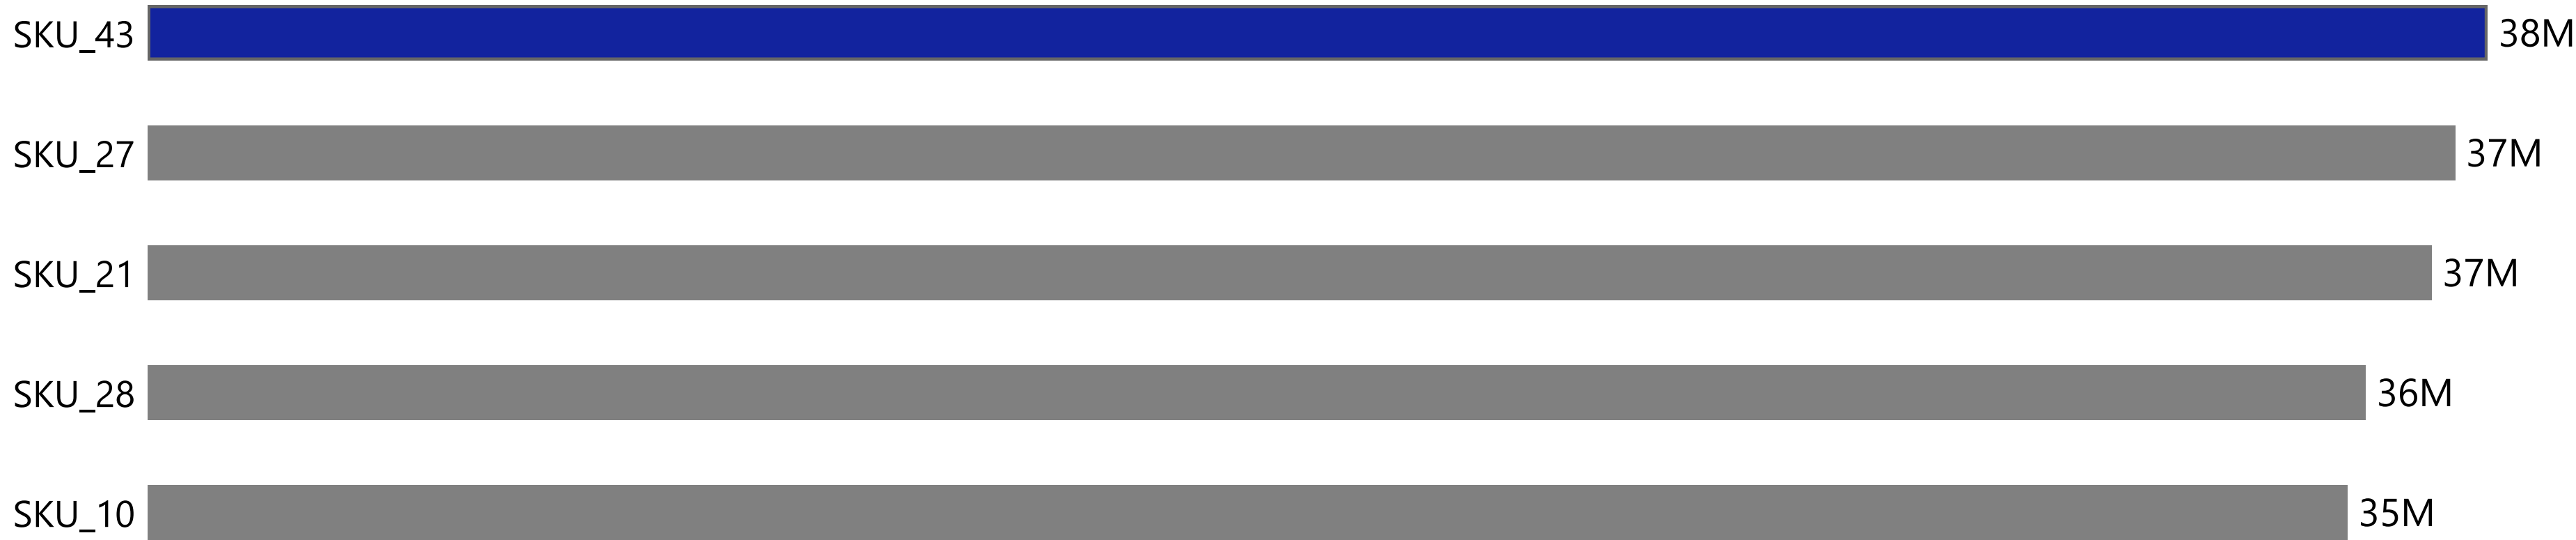

Dead stock (6+ months) accounts for the vast majority of our Furniture holding costs.

The Action & Impact View

To clear the Furniture bottleneck, operations must immediately target these top 5 dead stock SKUs.

Business Impact: Executing this liquidation immediately injects **\$190M** in liquid cash, clears massive physical warehouse capacity, and permanently stops the ongoing holding cost bleed.
